Provides information on American history between the founding of the nation and the time of World War 1. Combines motivating stories with research-based instruction that helps students improve their reading and social studies skills as they discover the past. Every lesson of the textbook is keyed to California content standards and analysis skills.

Criticizes the way history is presented in current textbooks, and suggests a more accurate approach to teaching American history.

One cold rainy day when my father was a little boy, he met an old alley cat on his street. The cat was very drippy and uncomfortable so my father said, "Wouldn't you like to come home with me?" This surprised the cat—she had never before met anyone who cared about old alley cats—but she said, "I'd be very much

obliged if I could sit by a warm furnace, and perhaps have a saucer of milk."

Having always wanted a better life than that of a union miner, Mick looks to the town newspaperman as a mentor for his future, but after the radicals blow up the mining company's mill and martial law is imposed, Mick must take a stand with the rest of the unionists to put an end to the abuses by those in power.

Surprise! You've just been laid off from the teaching position in which you have so passionately invested your time, talents and heart for years! What now? Hundreds of thousands of American teachers have been laid off in the last four years as a result of the long term recession that continues to challenge the country's economy. In this book, one of those teachers shares what that experience was like for her, how she coped with unexpected unemployment, and what she learned about finding her way as a teacher without a classroom. Full of not only truthful reflection and encouragement for teachers facing similar situations, this book also offers practical tips for how to handle lay-off and unemployment, and how to prepare yourself as an education professional to expand your career outside your classroom. These are uncertain times, but teachers don't need to feel uncertain about their careers. There IS life as an education professional after lay-off!

Dr. Griffiths' Principals of Inclusion is both a practical, realistic blueprint and an inspiring call to action for accelerating schools/school systems in their search to optimize all students' potential (inclusion). In an information age and an increasingly interconnected Global Village, no student's potential can afford to be wasted, especially by exclusionary educational practices/traditions (either conscious or unconscious). Dr.

Griffiths writes clearly, using universal metaphors/tactics applicable to all educational situations.

Here is a new text that fulfills an emerging need in both higher and public education and stands to break new ground in addressing critical skills required of graduates. When working on their last book, *It Works for Me, Creatively*, the authors realized that the future belongs to the right-brained. While Daniel Pink and other visionaries may have oversimplified a bit, higher education is ripe for the creative campus, while secondary education is desperately seeking a complement to the growing assessment/teach-to-the-test mentality. You don't have to study the 2010 IBM survey of prominent American CEOs to know that the number one skill business wants is students who can think creatively. To meet the demand of new courses, programs, and curricula, the authors have developed a 200-page "textbook" suitable for secondary or higher education courses that are jumping on this bandwagon. *Introduction to Applied Creative Thinking*, as the title suggests, focuses not on just developing the skills necessary for creative thinking, but on having students apply those skills; after all, true creative thinking demands making something that is both novel and useful. Such a book may also be used successfully by professional developers in business and education. For this book, Hal Blythe and Charlie Sweet are joined in authorship by Rusty Carpenter. He not only directs Eastern Kentucky University's Noel Studio for Academic Creativity but has co-edited a book on that subject, *Higher Education, Emerging Technologies, and Community Partnerships* (2011) and the forthcoming *Cases on Higher Education Spaces* (2012). *Introduction to Applied Creative Thinking* is student-friendly. Every chapter is laced with exercises, assignments, summaries, and generative spaces. Order copies now or contact the publisher for further information.
