Provide a dialogue in your classroom using Robbins' unique CULTURAL ANTHROPOLOGY: A PROBLEM-BASED APPROACH, 6e. Using a hands-on, participatory, active-learning approach that encourages critical thinking and discussion, this leading brief text introduces key research problems studied by anthropologists. Within the book's engaging narrative, author Richard Robbins teaches students to analyze their own culture as a basis for understanding the cultures of others. Presentations are organized around research problems rather than topics, creating a natural, integrated discussion of traditional concern, such as kinship, caste, gender roles, and religion. Students explore these subjects within the context of meaningful questions. The text's brief length and manageable cost provide the flexibility to add original research or ethnographies to enrich students' exposure to anthropology. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Cultural Anthropology provides students with the anthropological tools to question and understand their own culture and the world. Key updates for the sixth edition include a shorter length and more streamlined focus, China and Hindu South Asia combined into a single chapter, a new chapter assessing imperialism and the breakdown of states, and more.

Like other Overture Books, Mirror for Humanity is designed to provide a concise, relatively low-cost introduction to cultural anthropology. The organization is intended to cover core and basics, while also illustrating prominent current issues. Reflecting the world itself, anthropology seems to change at an increasing pace. Mirror for Humanity provides a fully-up-to-date, affordable alternative.
