A STANDALONE SEQUEL TO THE BEST-SELLING DARK SPACE SERIES THE UNIVERSE IS DARKER THAN WE THOUGHT... Lucien Ortane is a Paragon in the Etherian Empire. His job is to explore the universe and spread Etherian doctrines of peace, justice, and immortality to sentient beings everywhere. Like all Paragons, and most citizens, Lucien believes that Etherus, the benevolent ruler of the Empire, is exactly who he claims to be: the one true God and creator of the universe. But not everyone is a believer. The Academy of Science circulates a petition to send a mission to the cosmic horizon and learn the true nature of the universe. Over a billion people sign it, and Etherus grants their request, but with a dire warning: evil is lurking in the dark. Undaunted by this warning, three hundred million scientists from the Academy prepare to leave the Empire on what will be the longest and most incredible journey in history. A small group of Paragons also join the mission, each of them for their own reasons. Lucien Ortane tells himself that he's going in order to settle other people's doubts, and to keep a bunch of hapless scientists safe. After all, he's a Paragon, one of Etherus's most faithful servants. Yet even the faithful have doubts. Is the universe infinite? Does it have an edge? Is it shaped like a sphere, or connected like a torus? Did it need a creator, or does it cycle endlessly, god unto itself? These are the questions that the Academy is trying to answer, but the answers they get could be their undoing. God or not, Etherus was telling the truth about one thing: evil is lurking in the dark...

Spark your child's imagination through science and learning with this captivating astronomy book for toddlers. When it comes to kids books about black holes nothing else can compare to this clever science parody from the #1 science author for kids, Chris Ferrie! PLUS, use a black light to reveal secret, invisible text and artwork that reverses the story from nothing to the scientific creation of everything! Using the familiar rhythm of "There Was an Old Lady Who Swallowed a Fly," follow along as the black hole swallows up the universe and everything that exists in it, from the biggest to the smallest pieces of matter. The silly, vibrant artwork is sure to make stargazers of all ages smile and start a love of science in your baby. There was a black hole that swallowed the universe. I don't know why it swallowed the universe—oh well, it couldn't get worse. There was a black hole that swallowed a galaxy. It left quite a cavity after swallowing that galaxy. It swallowed the galaxies that filled universe. I don't know why it swallowed the universe—oh well, it couldn't get worse.

Brady Garrett needs to go home. He's a conscripted recruit on Defender Three, one of a network of stations designed to protect the Earth from alien attack. He's also angry, homesick, and afraid. If he doesn't get home he'll lose his family, but there's no way back except in a body bag. Cameron Rushton needs a heartbeat. Four years ago Cam was taken by the Faceless--the alien race that almost destroyed Earth. Now he's back, and when the doctors make a mess of getting him out of stasis, Brady becomes his temporary human pacemaker. Except they're sharing more than a heartbeat: they're sharing thoughts, memories, and some very vivid dreams. Not that Brady's got time to worry about his growing attraction to another guy, especially the one guy in the universe who can read his mind. It doesn't mean anything. It's just biochemistry and electrical impulses. It doesn't change the truth: Brady's alone in the universe. Now the Faceless are coming and there's nothing anyone can do. You can't stop your nightmares. Cam says everyone will live, but Cam's probably a traitor and a liar like the military thinks. But that's okay. Guys like Brady don't expect happy endings.

Have you ever tried to wrap your head around quantum physics? Have you ever tried to comprehend concepts of time and space that have been popularized by the promoters of the "new physics" and various eastern teachers? If you have, chances are either that your eyes glazed over or you felt as if your head might explode at any moment. Here for the first time, the concepts that have been propounded by the great thinkers and teachers of the twentieth century are made accessible in an illustrated guide. More importantly, this material is presented in a way that is non-threatening and fun. Using simple and delightful illustrations throughout, Favour, explores: The paradigm shift that has occurred, whether we are ready or not. How quantum physics and the new technology has challenged our experience of time and space. How the spiritual thought of East and West have melded. The relationship of self to oneness, of form to emptiness.
