Wealth management is one of the areas in which banks and other personal financial services players are investing heavily. But the market is changing fast. Going forward, players therefore need to adapt their strategies to the new realities: what worked in the past will not, for the most part, be appropriate in the future. This unique book, written by a former McKinsey consultant, offers an up-to-date, detailed, practical understanding of this exciting area of financial services.

The second issue in a new series, Global Financial Development Report 2014 takes a step back and re-examines financial inclusion from the perspective of new global datasets and new evidence. It builds on a critical mass of new research and operational work produced by World Bank Group staff as well as outside researchers and contributors.

India is ageing. One response of Indian policy makers has been introduction of the New Pension Scheme (NPS), a defined contribution pension scheme which is mandatory for civil servants and voluntary for the rest of the population. Given the size of the target population, even if take-up is modest, NPS savings may soon provide huge amounts of capital to India's economy. However, challenges are abound. What governance structure will best achieve the ultimate policy goal of serving the needs of savers? What business processes and information technology design will serve members best? How effectively will the NPS attack the problem of old-age poverty? In this book, a multi-disciplinary international team, comprising of economists, lawyers, pension management experts, and capital market experts, explore these and other

Acces PDF Financial Performance Ysis Icici Bank Mba Project

questions. The book proposes significant legal, regulatory, and governance reforms for the NPS and other existing pension schemes, as well. It finds that current NPS business practices cannot keep pace with potential growth of the system and makes suggestions on how to take better advantage of information technology. Based on review of experience elsewhere and state-of-the-art economic-demographic modelling, it warns that the NPS in its current form does not address the retirement income needs of the lifelong very poor, suggesting that it is only one in a range of responses needed to cope with the challenges of population ageing in India.

Microfinance India: State of the Sector Report 2010 presents the growth of the microfinance sector in India in its entirety. It offers in-depth, well-researched and well-analyzed evidence on how the sector has made an impact at various levels of the economy and society. The report provides most recent statistical data relating to the sector's growth and expansion across models. It highlights perspectives on current issues and documents new interest, new investments and innovations in the sector. The report collects information from authoritative sources, studies and reports on the sector and field studies on specific developments of interest. Included in the report are: a comparison of the performance of SHG and MFI models, Microfinance Penetration Indices that compare client outreach across states and discussions on innovations and novel experiments in the sector and themes of topical relevance. It also identifies knowledge and practice gaps that require further research and study. The best reference book on the annual trends and progress of the Indian microfinance sector, the report is a must for every microfinance practitioner.

This extraordinary book, written by leading players in a burgeoning technology revolution, is about the merger of finance and technology (fintech), and covers its various aspects and how they impact each discipline within the financial services industry. It is an honest and direct analysis of where each segment of financial services will stand. Fintech: The New DNA of Financial Services provides an in-depth introduction to understanding the various areas of fintech and terminology such as AI, big data, robo-advisory, blockchain, cryptocurrency, InsurTech, cloud computing, crowdfunding and many more. Contributions from fintech innovators discuss banking, insurance and investment management applications, as well as the legal and human resource implications of fintech in the future.

Microfinance india: state of the Sector Report is a series of annual reports on the microfinance sector in India. The Report seeks to document developments, clarify issues, publicise studies, stimulate research, identify policy choices, generate understanding and enhance support for the sector. It is a comprehensive one-stop document that provides the latest data and a holistic view of the sector, combines analysis and description and integrates a variety of topics hitherto treated piecemeal. The Report highlights recent developments in Self Help Groups (SHGs) and SHB-Bank Linkage Programmes (SBLPs), and focuses on microfinance with regard to the investment scenario in India. It also deals with the burgeoning field of urban microfinance, developments in micro-insurance and the impact of new technologies on the microfinance

sector. Additionally, it recognizes the high demands which the state makes on microfinance institutions and discusses the need and relevance of new policy regulations. Complementing these analyses, statistical annexures provide essential data on the sector, strengthening its utility as a reference document. It contains extensive original material, yet draws widely on the findings of other recent studies and reports, thereby providing a complete, detailed analysis of the status and the future of microfinance.

This book comes at a time when virtual organizations (VO), are proliferating exponentially due to the twin catalysts of globalization and technological enablement. It provides conceptual frameworks and simple tools for identifying and addressing the complexities of managing geographically dispersed, virtually linked organizations, which may have grown organically or inorganically into a potpourri of multiple cultures, capabilities and practices. These can help to scientifically assess the impact of virtualization, balance the physical with the virtual and manage risks using early indicators. The book provides mechanisms to recognize, localize, measure and address vulnerabilities. Ensuring knowledge transfer effectiveness (KTE) is vital in VOs. A diagnostic tool has been evolved to measure KTE, isolate problems and weak links and plan effective interventions. A set of critical factors to increase the probability of success of globalization strategies have been identified. This book interleaves theory with practice and provides insights drawn from conversations with business leaders, exploratory surveys, and in-depth research using a large sample. The solid methodological underpinnings serve as a useful template for researchers, while the models can be contextualized to suit any organization. Foreword by Mr. Ajit Balakrishnan, Chairman and CEO, Rediff.com; Chairman,
