~~Excretory System~~

Ureter- these parts of the excretory system are connected from the kidneys(see image A)to the urinary bladder(see Image A). This transports the waste from the kidneys to the bladder for storage.

Urethra - this part of the body takes urine from the bladder (see image A) out of the system

represents the different parts of the human excretory system.

Excretion in Humans.

Excretion is the process where all the metabolic wastes are removed from the body.

Excretion in humans is carried through different body parts and internal organs in a series of processes.

System - Everything
You Need to Know~~

Most often, people include defecation and urination as part of the excretory system.

However, defecating is usually studied under the digestive system, while urination is studied under the excretory system.

Therefore, the excretory

Where To Download

system can also be studied as the urinary system. Kidney
