Car Engine Overhaul. When a car's engine begins to sound "funny", when it idles, while it is accelerating, or as it turns off, then you may need an engine overhaul. Even smoke billowing from the exhaust pipe, or if your car runs too hot, it could spell serious engine damage. It is hard to say without a check-up from a reputable auto service centre like Super Tune, but you just may need to take your engine apart, clean it up and replace any damaged engine parts or seals, and then put it ...

A rebuilt engine involves removing the engine from the vehicle and completely disassembling it from what's commonly referred to as "carb to pan". This is an older description when engines had carburetors instead of fuel injection systems they have now, so today it would be referred to as "Injector to Pan," with the pan being the oil pan. Once the engine has been disassembled, cleaned, and inspected, all damaged parts are replaced with new or refurbished replacement parts.
