The environmental impact of paper is significant, which has led to changes in industry and behaviour at both business and personal levels. With the use of modern technology such as the printing press and the highly mechanized harvesting of wood, disposable paper became a relatively cheap commodity, which led to a high level of consumption and waste. The rise in global environmental issues such as air and water pollution, climate change, overflowing landfills and clearcutting have all lead to inc

~~Environmental impact of paper - Wikipedia~~

The pulp and paper industry is a big contributor to the problem of deforestation and is partly to blame for the endangerment of some species that live in the forests. The life cycle of paper is damaging to the environment from beginning to end.

~~Environmental Impact of Paper Production - The World Counts~~

The major environmental problems that are facing the world today are deforestation, global warming, and water pollution. The decimation of Earth's forest is one of the most serious global environmental problems (Paul and Anne 162). Deforestation can affect biodiversity, the atmosphere, and land.
